1. Presentation- tips

- Make sure to prepare your presentation well!
  - Getting slides from authors or other sources is NOT allowed
- Grading will be based on how well you
  - organize and deliver your presentation
  - cover the critical points of the paper
  - answer questions

Key points of presentation

- Be very clear about how much time you have
- Be very clear about your key message
- Most good speakers average two minutes per slide
- Each slide should have clear heading.
- Make appropriate use of pictures
- Each slide should normally contain around 25-35 words
- Reemphasis later!

Presentation Grading

- Organization
- Presentation
- Knowledge of material
- Time management
- QA

Category	Full points	Points
1. Organization ● Thoughts and ideas flow in a logical manner. ● Objectives/goals are clearly stated. ● Methods are clearly illustrated. ● Results are clearly presented.	30	
2. Presentation ● Oral presentation and delivery. ● Exhibits good body posture. ● Maintains good eye contact with audience. ● Good articulation. ● PPT design.	20	
3. Knowledge of material ● Familiarity with subject matter. ● Introduce basic background knowledge. ● Make listeners feel easy to understand.	20	
4. Time management ● Properly divide time to different parts. ● Total time control.	15	
5. Q&A How well the presenters answer questions?	15	
Total	100	

A Generic Talk Outline

- **Title/author/affiliation** (1 slide)

- **Forecast** (1 slide) (optional)
  Give gist of problem and insight found (What is the one idea you want people to leave with? This is the "abstract" of an oral presentation.)

- **Outline** (1 slide)
  Give talk structure. (Audiences like predictability.)

- **Background**
  - **Motivation and Problem Statement** (2-3 slides)
    (Why should anyone care? Most researchers overestimate how much the audience knows about the problem they are attacking.)

  - **Related Work** (2-3 slides)
    Important in the class presentation

- **Methods** (4-8 slide)

A Generic Talk Outline

- **Results** (3-6 slides)
  - Present key results and key insights.
    - Do not superficially cover all results; cover key result well.
    - Do not just present numbers; interpret them to give insights.
- **Summary** (1 slide)
- **Future Work** (1-2 slides)
  - Give problems this research opens up.
  - Put down your own opinion.
- **Backup Slides** (0-3 slides)
  Optionally have a few slides ready (not counted in your talk total) to answer expected questions. (Likely question areas: ideas glossed over, shortcomings of methods or results, and future work.)
- Better to set page number up

Some issues

- 12 minutes presentation
- 3 minutes Q&A
- Everyone should get involved in
- Both English (Chinese?) are ok, but the slides has to be in English.
- Be informative, more background knowledge to the audience
